Equipped with an IGBT rectifier, the PowerClever Series keeps your critical loads protected while its space-saving compact design and front access reduce mean time to repair.

The PowerClever Series has high input power which leads to reduced electricity pay-out, minimizes cable, switchboard, fuse and generator requirements, resulting in a reduction in investment cost.

Low input current total harmonic distortion (THDi) at less than 3% helps to avoid the disturbance and the need for expensive harmonic filters.

ONLINE UPS

HIGHLIGHTS

- IGBT PWM Rectifier & Inverter Technology
- Low Input Current THD (<3%)
- High Input Power Factor (>0.99)

DSP POWER FACTOR CORRECTED IGBT RECTIFIER

- Equipped with its new IGBT rectifier PowerClever Series keeps your critical loads protected while its space-saving compact design and front access for maintenance successfully reduce mean time to repair (MTTR).
- Thanks to the wide variety of accessories and options PowerClever Series presents maximum flexibility advantage to users and optimizes total cost of ownership.

HIGH PERFORMANCE & LOW TOTAL COST OF OWNERSHIP

- IGBT based power factor correction technology provides input power factor close to 1 (≥ 0.99). The high input power leads to reduced electricity pay-out, minimizes cable, switchboard, fuse and generator requirements, thus reducing investment cost.
- Low input current total harmonic distortion (THDi) less than 3% helps to avoid the disturbance and expensive harmonic filters.
- Small footprint and easy maintenance.

To enable loop connection helps the UPS system to continue the operation when the connection is interrupted.

12 Pulse Rectifier UPS
Traditional UPS
PowerClever UPS

OUTPUT THD POWER FACTOR

PowerClever with IGBT Rectifier <3% <0.99
Traditional UPS with Input Filter <10% <0.95
UPS without Input Filter <25% <0.85
**HIGH INPUT POWER FACTOR**

- 0.99 Input power factor ensures clean and sinusoidal input current.
- The high input power leads to reduced electricity pay-out, minimizes cable, switchboard, fuse and generator requirements, thus reducing investment cost.

**MAXIMUM AVAILABILITY**

- Parallel configuration up to 8 units per redundancy (N+1) and power increase.
- Loop connection helps the UPS system to continue the operation when the connection cable is interrupted.

**STANDARD ELECTRICAL FEATURES**

- Backfeed Protection
- Cold Start (Optional)
- Advanced Battery Management
- Short Circuit and Overload Protection
- Parallel Ready
- Redundant Power Supply
- Power Walk-in for Progressive Rectifier Start-up when the Mains is Restored
- Battery Temperature Sensor
- Static & Manual Bypass Operation

**ADVANCED COMMUNICATION FEATURES**

- 500 Real Time Event Log with Detailed Parameters
- User Friendly Multilingual 320x240 Graphic Display Provides Operation Information
- Monitoring and Shutdown Software
- RS232 Serial and RS485 Ports
- Modbus RTU (Optional)
- 2 Communication Slots
- Remote Emergency Power Off (Optional)
- Remote Display Panel (Optional)
- Dry Contact (Optional)
- SNMP (Optional)
- ProfiBUS (Optional)

**FLEXIBILITY**

- Temperature sensor for external battery cabinets for extended runtimes.
- External battery cabinets for different sizes of batteries to provide extended runtimes.
- Different sizes of 10-40kVA cabinets for larger capacity of internal batteries when long autonomy times are required.
- 3/1 Phase version is available for 10-30kVA power ratings.
- Frequency converter mode.
- Isolation transformers to vary neutral connectivity in the event of separate power sources or for galvanic isolation between input and output.
- Compatible version with EN 50171 for supplying power to emergency lighting systems.
POWERCLEVER SERIES
10-120 kVA

POWERCLEVER SERIES 10-60 kVA

1. Parallel Port Terminal
2. RS232 Terminal
3. Optional Card Slots
4. Manual DC Precharge Button (Automatic Precharge is Option)
5. Manual Bypass/Input/Output/Battery MCBs
6. External Battery Temperature Sensor Terminals
